# Managed Security Operations Center (MSOC)

Rapidly detect incident across your ever-evolving attack surface.

**Are you effectively monitoring your attack surface for potential malicious threat actors and cyber attacks?**
Is your organization's attack surface vigilantly monitored against the ever-looming threat of malicious actors and sophisticated cyber attacks? In today's digital realm, with the proliferation of cloud technologies and increased remote work setups, the boundaries defining your cyber exposure are constantly stretching. Relying solely on traditional managed SOC solutions might leave gaps, as they predominantly concentrate on endpoints and network traffic, often detaching organizations from their own vital security data. SubRosa believes that your security team should have immediate, unobstructed access to your data, empowering them to take swift actions without any mediatory layers. Our managed SOC solution is designed with this core belief in mind, ensuring that while we provide our unmatched expertise in data handling and security analytics, you retain direct control and accessibility over your own security tools and data.

**SubRosa's Next Generation Security Operations Center**
SubRosa's Next-Generation Security Operations Center is the epitome of cutting-edge cyber defense. Powered by proprietary threat hunting techniques meticulously developed in-house, our US-based operations work tirelessly 24/7 to safeguard your digital assets.

## SubRosa's Differentiators

- Our Managed SOC analysts hail from former government and law enforcement agencies and have been on the front lines of incident detection, triage and response for decades.

- Proprietary threat hunting data and methodologies provides second-to-none capabilities.

- Defend against threats that could impact your brand, company and supply-chain.

Beyond mere detection, we take proactive measures to predict and counter emerging threats. Offering more than a robust defensive front, our team is fortified with deep cybersecurity intelligence and round-the-clock vigilance, ensuring that your organization remains resilient and steps ahead in this ever-evolving cyber landscape.

# Features

### 24/7 Monitoring
Experience round-the-clock vigilance with SubRosa's 24/7 Managed SOC, ensuring unwavering protection and immediate response in our ever-evolving digital landscape.

### Managed Email Security
Guard your communication lifeline with SubRosa's Managed Email Security, providing ceaseless protection against sophisticated email-borne threats 24/7.

### Third Party Log Ingestion
Enhance your security perspective with SubRosa's Third Party Log Ingestion, ensuring comprehensive integration and analysis of external data sources around the clock.

### Tier 2, and 3 Incident Response
Scale your defense capabilities with SubRosa's Tier 2 and 3 Incident Response, delivering advanced expertise and rapid interventions to complex security challenges around the clock.

### Computer Forensics Services
Dive deep into digital evidence with SubRosa's Computer Forensics services, unlocking critical insights and ensuring comprehensive, accurate, and defensible investigations.
